ACADEMIC PROJECTS

Zomato Restaurant Clustering & Sentiment Analysis

- Cleaned and processed **50,000+ restaurant records**, performing feature engineering on cost, cuisine, and rating attributes.
- Analyzed **10,000+ reviews** using NLTK, and Bag-of-Words; applied K-Means and Agglomerative Clustering to identify restaurant segments.

Android Authenticity Prediction – Malware Classification

- Developed a binary malware classifier using Logistic Regression, Decision Trees, Naive Bayes, Gradient Boosting, and XGBoost.
- Optimized models using Grid Search Cross-Validation and achieved **92% classification accuracy** in distinguishing malicious and benign Android applications.

Bike Sharing Demand Prediction – Regression

- Developed demand forecasting models using Linear Regression, Random Forest, and XGBoost to predict bike rental demand.
- Evaluated model performance using **MSE, RMSE, MAE, and R^2** metrics and compared model effectiveness for demand prediction.

TRAINING

ALMABETTER — Bangalore **Jan 2023 – Feb 2024**
Data Scientist & Data Analyst

- Completed intensive project-based training in Python, SQL, machine learning, data analytics, and business intelligence.
